

Today's business environment demands information at your fingertips, and requires you to have the ability to slice and dice / drill down and discover patterns in data that provides actionable intelligence.

Actionable Intelligence are serious considerations that organizations are moving forward, and this requires innovative way of information analysis and business insights that can provide a 360 degree view of the their performance.

With you as our customers, we would like to showcase to you where business intelligence has moved beyond what you have seen or experienced, what's new and trends that various organizations are adopting to move towards profitability, productivity and customer loyalty.

During the event, you will be able to experience

- New ways data is mined, visualized and experienced across an organization
- How organizations are using agile way of building and managing information repositories
- Blend of business analytics with location intelligence
- Our solution pack that offers organization a QuickWin approach to implementing departmental BI Analytics

Join us on the **21st of September 2016 (Wednesday)** morning to find out more about our solution offerings. This free event is by invitation only, and we have limited seats, thus please do register to avoid disappointment. Detailed Agenda will be sent once registration is confirmed by us.

Do not miss out to meet our principals such as Alteryx, WhereScape, Syncsort, HP and Microsoft at the Venue.
