Data Security & Data Forensics: Responding to Big Data Breach

JOIN FREE!

About this workshop

You can have data without information, but you cannot have information without data. Such is the industrial revolution, everybody regardless of industry focuses on collecting data. Data collection has become an important part of any business to sustain. Along the process, securing the collected data has become a greater responsibility. Each of us understand, information is the single most valuable commodity. A lot of breaches have been reported over the years. Malaysia is no exception and has experienced massive data breaches. In 2017, personal details of some 46.2 million mobile number subscribers in Malaysia were sold for RM 3,000 for 10,000 records. In 2018, Malaysia was rocked again with Astro IPTV data leak and the data was sold online for RM 4,500 for 10,000 records.

1MDB, SingHealth, Facebook Cambridge Analytica scandal - we all know that there is no such thing as 100% security. The question is, how do we anticipate before and respond after the incidents? Keen to explore with us? Enroll NOW - more to be unleashed in our workshop. Seats are limited to first 40 participants. 5th October - Save the date!
